Indore, Madhya Pradesh, India

SUMMARY

Computer Science graduate (CGPA: 8.1/10.0) with hands-on experience in full-stack development, REST API (Representational State Transfer Application Programming Interface) development, and system configuration using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in building scalable applications, optimizing performance, and working with cloud deployment tools such as AWS and Docker. Seeking a Software Engineer or Full Stack Developer role to contribute technical skills and grow with a forward-thinking team.

EDUCATION

Rajiv Gandhi Proudhyogiki Vishwavidyalaya (RGPV)

Bachelor of Technology in Computer Science | CGPA: 8.1 / 10.0

Emmanuel Higher Secondary School

Higher Secondary Certificate (HSC), 12th Grade | Percentage: 80%

Bhopal, Madhya Pradesh

June 2026

Sagar, Madhya Pradesh

May 2022

SKILLS

Programming Languages: JavaScript, Python, TypeScript, HTML, CSS

Frameworks and Libraries: Node.js, Express.js, React.js, Redux Toolkit, Tailwind CSS, GSAP

Databases: MongoDB, MySQL (Structured Query Language), Redis

Cloud and DevOps: Docker, AWS EC2 (Amazon Web Services), Git, GitHub, GitHub Actions, CI/CD (Continuous Integration and Continuous Deployment), Linux

AI and ML: Generative AI (Artificial Intelligence), Large Language Models (LLMs)

WORK EXPERIENCE

VidyaGxP

Full Stack Developer

Indore, Madhya Pradesh

July 2026 – Present

- Built and polished responsive frontend interfaces using React.js for a pharmaceutical Electronic Quality Management System (eQMS) platform, focusing on clean UI and smooth user experience across 5+ core modules.
- Developed 3 key frontend modules – user management, role-based access control, and department management – within the admin dashboard.
- Worked closely with a team of 4+ designers and backend developers to translate requirements into functional, well-structured UI components.
- Prepared client-facing documentation covering 5+ platform modules to support smooth onboarding for end users.

Brain Inventory

Software Developer Intern

Indore, Madhya Pradesh

February 2026 – May 2026

- Worked on backend development using Node.js and Express.js, following standardized coding practices and system configuration procedures to keep the codebase clean, consistent, and easy to maintain across AWS EC2 (Amazon Web Services Elastic Compute Cloud) deployments.
- Assisted in REST API (Representational State Transfer Application Programming Interface) development and testing, including basic Redis caching that improved response times for frequently used endpoints by up to 35%.
- Supported system upgrades, patch releases, and issue resolution across 10+ tickets; maintained configuration logs and API documentation to keep the team's workflow organized and reduce onboarding time for new integrations.
- Collaborated with the team on CI/CD (Continuous Integration and Continuous Deployment) pipelines using GitHub Actions, and containerized 3+ services with Docker to support smoother and more consistent deployments.

InternPluss

Frontend Developer Intern

Remote

July 2024 – September 2024

- Built responsive user interfaces using HTML, CSS, and JavaScript across 3+ web applications, improving user experience by 20% and reducing defects by 25% through code reviews and system testing.
- Resolved frontend issues in a timely manner, prepared status reports, and applied SEO (Search Engine Optimization) best practices that increased organic website traffic by 15%.

PROJECTS

TrustLens AI – Intelligent Website Security Analyzer

github.com/Neetesh26

Tech Stack: React.js, Node.js, Selenium, Large Language Models (LLMs), REST APIs

- Developed an AI-powered security analyzer with automated deep crawling across 20+ internal pages per scan; built a trust scoring engine using 10+ parameters including SSL and HTTP headers, improving threat detection accuracy by 30%.
- Engineered Selenium-based crawling with asynchronous optimization and loop prevention, improving overall scan efficiency by 35%.

E-Commerce Platform – Full Stack Production Application

github.com/Neetesh26

Tech Stack: React.js, TypeScript, Node.js, Redis, Docker, AWS EC2, CI/CD, GitHub Actions

- Built and deployed a scalable e-commerce application with 30+ product listings; reduced API response time by 35% via Redis caching and integrated a secure payment gateway with full error handling and monitoring.
- Deployed on AWS EC2 using Docker containers and automated CI/CD pipelines via GitHub Actions, improving deployment efficiency by 45% and incorporating AI-based recommendations to boost user engagement.
